

**QNE Technology Services:** We are looking for an Experienced **Senior ReactJS Developer** who is proficient with React JS, and other trending libraries is a plus point. Your primary focus will be on developing user interface components and implementing those following well-known React.js workflows (such as Flux or Redux) and you'll be responsible for guiding the development and design of our client's services and projects. You'll contribute along with other developers to produce the highest quality software possible, and you'll be responsible for supporting and maintaining them along the way.

You will be responsible for architecting and building these applications, as well as coordinating with the teams responsible for other layers of the product infrastructure. Building a product is a highly collaborative effort, and as such, a strong team player with a commitment to perfection is required.

### **Educational Qualification/ Requirement:**

- Bachelor's Degree (Preferred)
- 4+ years of experience required

### **Job Description:**

- Developing new user-facing features using React.js
- In-depth knowledge of React.js and its fundamentals
- Knowledge of UI/UX designs and wireframes.
- Hands-on experience with React tools like Webpack, React-Proto, React Bootstrap, React.js, Flux, and Redux
- Building reusable components and front-end libraries for future use.
- Translating designs and wireframes into high-quality code.
- Knowledge of data structures libraries like Immutable.js
- Optimizing components for maximum performance across a vast array of devices.
- Strong understanding of JavaScript ES6, including Virtual DOM manipulation and the JavaScript object model.
- Build app and UI components from prototypes and wireframes
- Thorough understanding of React and its core principles.
- Familiarity with popular React workflows (such as Redux)
- Familiarity with RESTful APIs
- Familiarity with Xcode
- Familiarity with modern front-end builds pipelines and tools (GIT).
- Working knowledge of Web services, Web API, REST service and payment gateway
- Build pixel-perfect, buttery smooth UIs across both mobile platforms.
- In-depth knowledge of JavaScript, CSS3, HTML, and front-end languages.
- Developing and implementing front-end architecture to support user interface concepts.
- Write automated tests to ensure error-free code and performance

- Improve front-end performance by eliminating performance bottlenecks Building reusable components and front-end libraries for future use
- Experience with debugging and performance testing software.
- Reviewing application requirements and interface designs.
- **Skills Required:**
- Previous experience working as a React.js Developer.
- Excellent troubleshooting skills.
- Team spirit.
- Good problem-solving skills.
- BSc in Computer Science, Engineering, or relevant field

### Other Skills:

- Time management, Attention to detail.
- Punctual, responsible, and able to work independently where required.

### What you can expect after applying?

Once you've applied, sit back and relax while we get to work on our side! You can expect to hear back from us within 3 working days. Our recruitment team will call you up on the provided contact number for initial screening. Good luck!
